

Your car is...

too HOT for Spot!

When you turn off your car, all ventilation stops. A car's interior can reach 160 degrees in a few minutes, even on mildly warm days.

Dogs in hot cars are at risk for brain damage, stroke - even death.

To report an animal in distress, call Marin Humane at 415.883.4621.

If you have errands to run, it's best to leave your dog at home.
